

# Detergent Solutions

## FLEET WASH PRODUCTS (TOUCHLESS)

### STEP 1 – Low pH Presoaks

#### EVERSHINE

Evershine is our safest presoak and contains acid-replacement technology for a polished aluminum-safe 2-step washing process. Ships Non-Hazardous.

#### #1 UPPERCUT

#1 Uppercut is a simple presoak formula for a polished aluminum-safe 2-step washing process. #1 Uppercut is reclaim-friendly for water recycle systems and has similar applications as #1 Counterpunch but without aggressive acids and a more neutral fragrance. Ships Non-Hazardous.

#### #1 COUNTERPUNCH

An advanced citric acid formula for a polished aluminum-safe 2-step washing process. #1 Counterpunch also contains degreasing agents to assist with penetrating road film, greases, oils, and fingerprints. #1 Counterpunch could also be paired with aggressive HCS #2 truck wash soaps for a stronger 2-step wash without harsh brighteners.

#### #1 KNOCKDOWN **BRAND NEW!**

#1 Knockdown is a simple presoak formula for a polished aluminum-safe 2-step washing process. #1 Knockdown is cost effective and contains degreasing agents to assist with penetrating road film, greases, oils, and fingerprints. #1 Knockdown could also be paired with aggressive HCS #2 truck wash soaps for a stronger 2-step wash without harsh brighteners.

#### #1 CITRIC PRE-SOAK

#1 Citric Presoak cleans and lightly brightens polished aluminum for a polished aluminum-safe 2-step washing process. #1 Citric Presoak could also be paired with aggressive HCS #2 truck wash soaps for a stronger 2-step wash without harsh brighteners. Ships Non-Hazardous.

#### BLUE FUSION

Blue Fusion is a low pH presoak with a stronger blend of acid-replacement technology that has the ability to mildly brighten aluminum when paired with an aggressive HCS #2 truck wash soap. Ships Non-Hazardous.

#### M-37 PRE-SOAK

M-37 Presoak is formulated to be our strongest #1 presoak without HF, ABF, or Sulfuric acids. M-37 Presoak is reclaim-friendly for waste water recycle systems and can be paired up with multiple HCS 2nd step detergents.

#### SUPERSONIC PRE-SOAK

Supersonic Presoak is our most aggressive #1 presoak without Hydrofluoric Acid. Supersonic Presoak brightens aluminum and contains degreasing agents to assist with penetrating road film, greases, oils, and fingerprints. Supersonic Presoak pairs well with any aggressive HCS #2 truck wash soaps for a strong 2-step wash.

#### #1 CITRIC PRE-SOAK SPECIAL

Contains the same cleaning benefits as our original #1 Citric Presoak but is enhanced with a mild amount of Hydrofluoric Acid. The safer amount of aggressive acids makes it less reactive to glass surfaces and with a pleasant citrus fragrance.

#### #1 FLEET PREP

#1 Fleet Prep is an economic aggressive #1 presoak and aluminum brightener. #1 Fleet Prep pairs well with any aggressive HCS #2 truck wash soaps for a strong 2-step wash. Contains Hydrofluoric Acid.

#### #1 SHOCKWAVE **BRAND NEW!**

#1 Shockwave is an advanced formula aggressive #1 presoak and aluminum brightener. #1 Shockwave also contains degreasing agents to assist with penetrating road film, greases, oils, and fingerprints. #1 Shockwave pairs well with any aggressive HCS #2 truck wash soaps for a strong 2-step wash. Contains Hydrofluoric Acid.

## FLEET WASH PRODUCTS (TOUCHLESS)

### STEP 2 – High pH Soaps

#### PRO-WASH

Pro-Wash contains a simple proven formula that is safe for polished aluminum fleets when paired with polished safe HCS #1 low pH presoaks in a 2-step washing process. Pro-Wash is also reclaim-friendly with a medium foaming profile and a user-friendly scent. Ships Non-Hazardous.

#### PANDA

Panda contains a complex high-foaming & degreasing formula that is safe for polished aluminum fleets when paired with polished safe HCS #1 low pH presoaks in a 2-step washing process. Panda is a preferred choice as a single-step soap for all vehicle types. Panda also leaves a glossy appearance on vehicle paint due to a spray-wax additive.

#### PANDA-LF (Low Foam)

Panda-LF has similar features as our original Panda with a lower foaming & quicker rinsing formula that is reclaim-friendly and more efficient.

#### #2 APEX **BRAND NEW!**

#2 Apex is an economic cleaning & degreasing formula that does not sacrifice performance and is safe for polished aluminum fleets when paired with polished safe HCS #1 low pH presoaks in a 2-step washing process. #2 Apex is a quicker rinsing formula that is reclaim-friendly. **MIX IN "FOAM ADD" TO INCREASE DWELL TIME & CLINGING EFFECT!**

#### FILM FIGHTER

Film Fighter is a proven medium-aggressive formula that performs as a versatile degreaser soap & 2nd step in a 2-step washing process. Film Fighter has a medium foaming profile and user friendly scent while also maintaining performance in hard water conditions.

#### FLEET BRITE

Fleet Brite is a traditional "Brown Soap" with an aggressive formula that performs as a versatile degreaser soap & 2nd step in a 2-step washing process. Fleet Brite is low-foaming with great rinsing ability with a dark brown color that has a visible appearance as it's applied to vehicle paint.

#### #2 BUZZSAW

#2 Buzzsaw is our most economic "Brown Soap" with an aggressive formula that performs as a 2nd step in a 2-step washing process. #2 Buzzsaw is low-foaming with easy rinsing ability.

#### GRIZZLY

Grizzly is our premium "Brown Soap" with a complex high-foaming & aggressive degreasing formula that performs as a versatile degreaser soap & 2nd step in a 2-step washing process. Grizzly is also a preferred choice as an aggressive single-step soap for non-polished aluminum vehicle types. Grizzly also leaves a glossy appearance on vehicle paint due to a spray-wax additive.

#### #2 SUREFIRE **BRAND NEW!**

#2 Surefire is an aggressive economic cleaning & degreasing formula that does not sacrifice performance and performs as a versatile degreaser soap & 2nd step in a 2-step washing process. #2 Surefire is also an economic choice as an aggressive single-step soap for non-polished aluminum vehicle types. #2 Surefire is a quicker rinsing formula that is reclaim-friendly. **MIX IN "FOAM ADD" TO INCREASE DWELL TIME & CLINGING EFFECT!**

#### DYNACLEAN & BRIGHT

Dynaclean & Bright is an advanced aggressive formula that performs as a versatile degreaser soap & 2nd step in a 2-step washing process while also maintaining performance in hard water conditions. Dynaclean & Bright is low-foaming with easy rinsing ability and can also brighten aluminum as a single-step soap for non-polished aluminum vehicle types.

## **ALUMINUM BRIGHTENERS**

### **QUICKSILVER**

Quicksilver is our premium aluminum brightener containing our most aggressive blend of acids to effectively brighten the look of the aluminum while leaving a silver, satin finish. Quicksilver is highly concentrated and performs in extreme conditions. Contains Hydrofluoric Acid.

## **FLEET WASH PRODUCTS (BRUSHING)**

### **HYDRO MAGIC**

Hydro Magic is a traditional vehicle wash soap that is safe for all surfaces & to the touch. Hydro Magic has a vibrant pink color and pleasant fragrance with outstanding stability in the presence of greasy oils and hard water conditions. Hydro Magic provides viscosity for lubrication of brushes and is great for use in foaming systems. Hydro Magic also re-wets if allowed to dry on the surface. Ships non-hazardous.

### **E-Z CLEAN**

E-Z Clean is a foaming soap formula that is more easily applied through automatic vehicle wash equipment and proportioning systems. E-Z Clean is safe for all vehicle surfaces. Ships non-hazardous.

## **SPECIALTY FLEET PRODUCTS**

### **BUG SOAKER THIN**

Bug Soaker Thin softens bugs and breaks down caked-on road film as an aggressive pretreatment & degreaser. Bug Soaker Thin is an aggressive formula that performs in extreme conditions and maintains performance when mixed to more economic dilutions.

### **BUG SOAKER SOP**

Bug Soaker SOP is a re-designed formula to be safe on polished aluminum surfaces. Bug Soaker SOP has the same characteristics as our original Bug Soaker Thin formula, but is typically effective only at stronger dilutions.

### **HYDRO-SHEEN**

Hydro-Sheen is a liquid spray wax that is applied as a final step to produce a glossy and protective finish on painted surfaces. Hydro-Sheen is also used as a rinsing aid when mixed into high pH soaps.

### **FOAM ADD**

Foam Add is a pH neutral liquid that can be mixed into high pH or low pH detergents to increase dwell time & enhance the clinging effect of soaps.

### **WASH TUNNEL WALL CLEANER**

Wash Tunnel Wall Cleaner is an aggressive blend of acids that cleans soap film, water scale, and surface rust stains. Wash Tunnel Wall Cleaner is safe on glass surfaces and does NOT contain Hydrofluoric Acid.

### **SALT DEFENDER**

Salt Defender is formulated to neutralize the effects of salt and chlorides more effectively than regular vehicle wash soaps to prevent corrosion.

### **ASPHALT XL-71**

Asphalt XL-71 is a solvent degreaser that works quickly and effectively to dissolve asphalt, tar, adhesives, and heavy greases. Asphalt XL-71 is a safer cost-controlled alternative to chlorinated solvents, d-limonene, and diesel.

### **FLEET QUAT**

Fleet Quat sanitizer is designed specifically for biosecurity systems, manufacturing and institutions where disinfection, sanitizing, and deodorization are of prime importance. Fleet Quat is effective against avian influenza and other pathogens. **FLEET QUAT IS EPA REGISTERED IN SELECT STATES & SUBJECT FOR APPROVAL PRIOR TO SALE!**

## **DEGREASERS & FLOOR SOAPS**

### **HC-36**

HC-36 is an outstanding general purpose cleaner and degreaser. HC-36 quickly penetrates and suspends greases and oils from their surfaces for easy removal. HC-36 is a non-caustic butyl degreaser and is safe for vehicle surfaces, polished aluminum fleets, glass, and floor scrubbers. Ships non-hazardous.

### **HCS-120**

HCS-120 is a near-neutral pH general purpose cleaner that is more environmentally friendly and non-hazardous for safer removal of oils & greases. HCS-120 is formulated without phosphates, caustic hydroxides, acids, phenols, petroleum solvents, or butyl. Ships non-hazardous.

### **HCS-400**

HCS-400 is a versatile foaming caustic cleaner and degreaser that will penetrate thick oils & greases for effective removal from vehicles, engines, floors, concrete, and kitchen exhaust systems. HCS-400 is also an aggressive #2 truck wash soap paired with your choice of HCS #1 presoaks or single-step detergent for non-polished aluminum vehicles.

### **#611**

#611 is a lower foaming degreaser with butyl for easy rinsing, quick drying, and more effective water recovery/reclamation applications. Excellent for factory cleaning, oils, greases, tread marks, engines, shop floors, meat cutting areas, equipment, and food hauling trailers. For use with floor scrubbing equipment, proportioning system, pressure washer injector, pump sprayer, or direct application pump.

### **PREP-SOLV**

Prep-Solv is a higher foaming general purpose cleaner and degreaser that contains no caustics, acids, butyl, or solvents. Prep-Solv uses a non-hazardous blend of surfactants to hold molecules in suspension for effective removal of oils, greases, and other soils. Prep-Solv can be used on non-glass surfaces and is safe to the touch. Ships Non-Hazardous.

### **POWER-SOLVE**

Power-Solve is a lower foaming general purpose cleaner and degreaser that contains no caustics, acids, butyl, or solvents. Power-Solve is an excellent black streak remover and uses a non-hazardous blend of surfactants to hold molecules in suspension for effective removal of oils, greases, & other soils. Power-Solve rinses easily from glass surfaces and is safe to the touch. Ships Non-Hazardous.

## **CONCRETE & CEMENT TRUCK CLEANER**

### **CTC**

CTC (Cement Truck Cleaner) is an aggressive acid cleaner with built-in corrosion inhibitors which protects vehicle surfaces and wiring. This product is highly effective in removing concrete slurry, cement splatter, lime, fly ash, and masonry dust. Use CTC to wash ready-mix trucks, pneumatic tankers, concrete handling equipment, forms, and tools.

### **CTC w/ RINSE AID**

CTC w/ Rinse Aid offers the same cleaning benefits as our original CTC formula and also provides added protection against corrosion & redeposit of sediments. CTC w/ Rinse Aid leaves a protective finish on which assists with regular cleaning and repeat washes.
